

Barreras Fitness Capstone Project

Using Data Analytics to Improve Coaching Decisions and Client Success

Miranda Rodriguez

Google Data Analytics Professional Certificate

July 2026

Business Background

- Barreras Fitness is an online fitness coaching business
- Clients receive personalized workout programs, nutrition guidance, accountability, and mindset coaching.
- As the business grows, tracking client progress becomes more challenging
- Data analytics can help improve coaching decisions, identify client trends, and support better outcomes.

Business Problem

- Coaches collect valuable client data but may not always identify important trends.
- It can be difficult to recognize when clients are becoming disengaged.
- The goal is to use data analytics to improve coaching decisions and client success.

Stakeholder & Business Task

Stakeholder

John Barrera

Owner & Online Fitness Coach

Barreras Fitness

Business Task

Analyze client progress and engagement data

Identify trends that improve coaching decisions

Provide data-driven recommendations to improve client retention and outcomes

Data Source

- Trainerize
- Microsoft Excel
- BigQuery (SQL)
 - Tableau
- Microsoft PowerPoint

Data Cleaning

- Imported data into Excel
- Checked for missing values
 - Standardized formatting
- Removed duplicates (if applicable)
 - Prepared data for analysis

SQL Analysis

- Average exercise compliance by client
- Average body weight by month
- Weight change from May to July
- Client-level progress comparison
- Identified highest and lowest performance

Tableau Dashboard

- Client Exercise Compliance
- Monthly Body Weight Trends
- Client Progress Comparison
 - Key Performance Metrics

Key Findings

- Monthly exercise compliance increased from 61.0% in May to 69.7% in July
- BF003 had the highest average exercise compliance at 88.3%
- BF002 had the lowest average exercise compliance at 49.7%
- Body-weight trends varied by client, showing the importance of tracking progress individually

Business Recommendations

- Continue tracking exercise compliance and body weight consistently
- Give additional coaching support to clients with lower compliance
- Use the dashboard to quickly identify changes in client progress
- Use individual trends to personalize check-ins and accountability

Reflections

- What I learned: How to turn raw client data into useful insights
- Skills developed: Excel, SQL, Tableau, data cleaning, and visualization
- Future improvements: Analyze more clients and collect more consistent data over a longer period
